

ALPHA ENGINEERING Intl. S.A.R.L **Health, Safety and Environment Policy**

ALPHA ENGINEERING Intl. S.A.R.L is committed to achieving and maintaining the highest standards of Health, Safety and Environment in all its activities in order to minimize risk to personnel, damage to assets, and adverse effects to the environment. Therefore, it is the Company's intention to pro-actively work with Employees, Clients, Contractors, Public and Government Agencies in order to achieve the highest possible standards of Health, Safety and Environment protection.

The Health, Safety and Environment objectives to which the Company assigns the greatest importance are:

- Minimise the risks posed to third parties and those fabricating, constructing, installing, commissioning and operating any facilities designed and engineered by the Company.
- Minimise any adverse effects our activities may have on the environment
- Provide a safe place of work
- Prevent all accidents and incidents at work

The Company seeks to achieve these objectives by the following:

- Providing adequate human, technical and financial resources
- Periodic HSE Training for company's employees
- Ensuring activities performed comply with all relevant laws and regulations.
- Clearly defining the responsibilities of personnel with regards to HSE
- Ensuring adequate communication with employees so that they understand their responsibility on HSE
- Providing safe premises and work places including access to and exit from them

This policy is applicable to all activities performed by **ALPHA ENGINEERING Intl. S.A.R.L**

Compliance with this policy is the responsibility of every individual and the undersigned has overall responsibility for implementation of the health, safety and environment policy.

General Manager
Mohamed ELLEJMI
